# Guide to Registration and Strategy Connection

By following this simple guide, you will be able to connect to the Linearity strategy and automatically copy all trades executed by our system to your personal account.

Once the account is connected, there is no need to keep any applications or programs running 24/7, as all trades will be replicated automatically without requiring any additional tools. You will only need to use the designated portal to manage the strategy and an app on your smartphone (Android or iOS) to monitor its performance.

# 1. Broker Registration

**fpmtrading**

To use our copy trading strategy, it is necessary to register and have an account with the selected broker (FP Markets).

To do so, visit the website: <https://fpmtrading.com/> using any browser, such as Google Chrome, Mozilla Firefox, or Microsoft Edge.

The screenshot shows the homepage of the fpmtrading website. At the top, there is a navigation bar with links for 'GETTING STARTED', 'TRADE', 'PLATFORMS', 'COMPANY', 'LOGIN' (in blue), and 'OPEN LIVE' (in a black button). Below the navigation bar, the main headline reads 'Fast. Tight. Reliable. Trade the world with FPM Trading.' with a subtext 'Get started in minutes!' and a 'START TRADING' button. To the right, there are two mobile phone screens displaying trading interfaces. The top phone screen shows a list of currency pairs with their current prices and spreads. The bottom phone screen shows a candlestick chart for the AUDCAD market with trade execution details like Stop Loss and Take Profit levels. At the bottom of the page, there are three key features highlighted: '0.0 Pip spreads', '1:500 Leverage', and '24/7 Customer support'.
